Nutrition Assessment and Monitoring and Evaluation Terminology

This is a combined list of Nutrition Assessment and Monitoring and Evaluation terms. All terms can be used for Nutrition Assessment. Client History terms are used for Nutrition Assessment, but not for Nutrition Monitoring and Evaluation. Each term is designated with an alpha numeric NCPT hierarchical code, followed by a five-digit (eg, 99999) Academy SNOMED CT/LOINC unique identifier (ANDUID). Neither should be used in nutrition documentation. The ANDUID is for data-tracking purposes in electronic health records.
